Chennai, India | Phone: +91 6383374683 | Email:[ssrivarsha06@gmail.com](mailto:ssrivarsha06@gmail.com) | [Linkedin](#) | [Github](#)

## EDUCATION

|                                                                                  |               |
|----------------------------------------------------------------------------------|---------------|
| <b>Vellore Institute of Technology</b> , Chennai   BTech-CSE.  CGPA:8.6          | 2023- Current |
| <b>Pushpalata Vidya Mandir</b> , Tirunelveli   10th Grade: 98%   12th Grade: 94% | 2012- 23      |

## SKILLS

- Programming & Languages : Python, C/C++, Java, HTML, CSS, JavaScript, Dart
- Frameworks & Libraries : Flask, React.js, Node.js, Flutter, Three.js
- Cloud & Databases : AWS, Firebase, MongoDB, MySQL
- DevOps & Tools : Git, Docker, Postman, Linux, Jupyter Notebook, VS Code, MS
- APIs & Security : REST APIs, JWT Authentication, OAuth 2.0, Cryptography
- Design & Frontend Technologies: UI/UX Design, WebGL, GLTFLoader, Blender
- AI/ML & Data Technologies : Transformers, NLP, Computer Vision, AI/ML Integration, TensorFlow, PyTorch, HuggingFace
- Linguistic Languages : English, Tamil- Proficient, Hindi- Intermediate, German- Basics

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Summer Research Internship</b> -VIT University, <i>Chennai, Tamil Nadu</i>                                                                                                                                                                                                                                                                                                                                                                          | May 2025 – July 2025 |
| <ul style="list-style-type: none"><li>▪ Researched <b>Automated Feedback Generation</b> using fine-tuned <i>BERT &amp; RoBERTa</i> transformer models.</li><li>▪ Implemented text preprocessing, semantic analysis, and context-aware evaluation techniques in Python (NLP, Transformers).</li><li>▪ Achieved approx. <i>15% improvement in feedback relevance</i> on test datasets.</li></ul>                                                         |                      |
| <b>Project Intern – MIRAI (AI-Powered Smart Fashion Mirror)</b> - Chennai                                                                                                                                                                                                                                                                                                                                                                              | Dec 2025 –Feb 2025   |
| <ul style="list-style-type: none"><li>▪ Built backend recommendation engine powering real-time AI smart mirror.</li><li>▪ Implemented vector-based similarity search and optimized retrieval for personalized outfit recommendations.</li><li>▪ Integrated metadata-driven rules with machine learning models to improve recommendation relevance.</li><li>▪ Supported backend APIs by delivering production-ready recommendation artifacts.</li></ul> |                      |

## RESEARCH & PROJECTS

|                                                                                                                                                                                                                           |      |                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------------|
| • <b>DressFit – AI-Driven Virtual Try-On Platform</b>                                                                                                                                                                     | 2024 | <a href="#">LINK</a> |
| React, Flask, Three.js, Blender, WebGL, AI  Personalized 3D avatar scaling and dress visualization using GLB models, deployed on Vercel  Improved avatar-fit accuracy by approx.50% using user-measurement-based scaling. |      |                      |
| • <b>AI-Podcast generator</b>                                                                                                                                                                                             | 2025 | <a href="#">LINK</a> |
| Python, GPT-4o, NLP, REST APIs, Streamlit, ElevenLabs API  Dual-Voice Script Generation  Automated 90% of podcast script creation.                                                                                        |      |                      |
| • <b>AWS Pet Adoption Platform</b>                                                                                                                                                                                        | 2025 | <a href="#">LINK</a> |
| EC2, RDS, S3, MySQL   Full-stack deployment of dynamic adoption workflows with cloud hosting  Reduced page load time by approx.40% through optimized AWS configuration.                                                   |      |                      |
| • <b>Blockchain Identity Verification</b>                                                                                                                                                                                 | 2025 | <a href="#">LINK</a> |
| React, Node.js, Solidity, Hardhat, Ethers.js   Implemented secure on-chain identity registry using Merkle Trees and smart contracts.                                                                                      |      |                      |

## ACHIEVEMENTS

- **IEEE MPCON 2026** – Paper accepted for oral presentation on *Blockchain-based Secure Aid Distribution using Zero-Knowledge Proofs*.

- Secured **17th place** out of 120 teams in *Hack-n-Droid 2025* organized by the Android Club, VIT Chennai.
- **School Topper** in CBSE Class 10 Board Examination.

## CERTIFICATIONS

---

- **GEN-AI Using IBM WatsonX** -IBM Developer Skills Network 11<sup>th</sup> June 2025
- **ns-3 Network Simulator Training** -IIT Bombay & Spoken Tutorial Project March 2025
