EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology, Chennai

Jun 2023 - Present

Current CGPA : 8.3/10

SKILLS

- **Languages:** Python, Java, C, C++, JavaScript, Dart
- **Web:** HTML5, CSS3, React, Bootstrap, Flexbox
- **Mobile/App:** Flutter, Firebase, Android SDK, SwiftUI
- **AI & Data:** NumPy, Pandas, TensorFlow, OpenCV, Machine Learning, LangChain, LLaMA-3, Prompt Engineering, LLM Agents
- **Cloud & DevOps:** REST APIs, Node.js, Git, GitHub, Supabase, MySQL, AWS (EC2, S3, Lambda, DynamoDB)
- **Security & Research:** Blockchain Concepts, Hashing (SHA-256), Tamper Detection

WORK EXPERIENCE

AI/ML Intern

ZenithIndia

May 2025 - Present

- Developed an SEO score prediction system using Python, scikit-learn, and computer vision to analyze product images and predict optimization scores, integrated with an interactive Streamlit web interface that processed 100+ product inputs per session, delivering real-time SEO insights and keyword suggestions, and improved prediction accuracy by 86% through model fine-tuning and data preprocessing.

Summer Research Intern

VIT Chennai

May 2025 - July 2025

- Worked as a Summer Research Intern developing an automated feedback-generation system for students' answers using NLP and generative-AI techniques. Built LLM-agent pipelines with LangChain to analyze 500+ responses and produce personalized, constructive feedback, reducing evaluation time and boosting model accuracy through data preprocessing, prompt optimization, and model fine-tuning.

PROJECTS

DressFit - 3D Avatar customization software | *React, Javascript, CSS, AR* [LINK](#)

2025

- Engineered a real-time AR virtual dressing solution with dynamic garment morphing achieving 95% projection fidelity and reducing visual mismatches by 60%, paired with a device-agnostic responsive UX interface enhancing user experience.

Authx - content theft verification using blockchain | *React, Hashing, Smart contracts* [LINK](#)

2025

- Designed a React-based content verification platform integrating AI tampering detection, cryptographic hashing, and blockchain-backed proof of ownership, achieving 98% detection accuracy while preventing manipulated or stolen content from being falsely claimed.

Risk-Adaptive Fractal Authentication System | *React, JavaScript, ML, Cybersecurity* [LINK](#)

2024

- Engineered a risk-adaptive fractal authentication framework integrating behavioral biometrics and contextual risk scoring, enabling dynamic trust-based access control and enhanced protection against credential compromise and replay attacks.

CERTIFICATES & ACHIEVEMENTS

- IBM Certified Generative AI Specialist
- Programming Fundamentals – IIT Bombay (C, C++, Python)
- Published a research paper, “A Hybrid AI-Blockchain Approach for Multi-Content Authentication and Ownership Proof Generation,” at ICCSP 2026
